Major nations usurp technology and each other's resources, the difference of wealth and poverty expands them in the world, and the civic poor's future begins to darken clearly. The transition stage whose exit which everyone wanders about in quest of an indulgence unconsciously is not visible...

It is an age when large-scale
natural disasters frequently
happen all over the world

It is a time when cyborgs and
autonomous robots are beginning to
appear on the market in technologi-
cally advanced nations

Major world powers compete for technology
and resources. The divide between rich and poor
grows and the future for the poor looks bleak.

In the transitional stage, everyone
wanders around in a self-indulgent daze
and the way out isn't clear..
